TRIP DESKTOP REFERENCE

RTOC SOPs

1. TRIP activation is initiated by on scene first responder:

Communicated directly to

Communicated by VSP and routed

TOC by VDOT or SSP Staff

OR

to the TOC by VSP Dispatch

NOTE: If TRIP Activation comes from a VDOT source, notify VSP Dispatch immediately before contacting TRIP company. This will prevent a rotational heavy duty tow truck from being dispatched by VSP and ensure proper TRIP response to the crash.

2. TOC logs all crash information per current S.O.P.
3. TOC identifies the correct TRIP Towing Company for the crash
4. TOC contacts the appropriate TRIP Towing Company
 - a. Identifies responding party
 - b. Advises correct location (i.e., mile marker, Interstate, direction)
 - c. Provides all pertinent details of the crash
 - d. Answer any questions from the TRIP Company
 - e. Advise **“your response time starts 00:00”**
 - f. Begin the timekeeping process
5. Notify the T.A.M.S. Contractor for emergency traffic control response for TRIP
6. TIMEKEEPING
 - a. Log the time that the TRIP towing company is dispatched
 - b. Receive & Document the on-scene arrival time for the TRIP TEAM
 - i. Trip TEAM is 2 wreckers and 1 support vehicle
 - c. Receive & Document the Notice to Proceed time given by I.C.
 - d. Receive & Document any work stoppage and startup times as reported by I.C.
 - e. Receive & Document Travel Lane Clearance time as reported by I.C.
 - f. Receive & Document Crash Scene Clearance time as reported by I.C.
 - g. Log all other information provided during the duration of the TRIP crash
 - i. Arrival of additional equipment or resources
 - ii. Change in condition
7. REPORTING
 - a. Make all crash notifications per existing S.O.P.
 - b. Log all crash information into the dispatch ATMS system
 - c. If ATMS cannot support enough information fields:
 - i. Manually log all information on TRIP Synopsis Report
 - d. Send event information to Program Manager within 5 days
